DETAILED OFFICE ACTION

1. This communication is responsive to the application filed on July 17, 2003. Claims 1-15 are presented for examination.

Claim Rejections - 35 USC §102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.
- 3. Claims 1-15 are rejected under 35 U.S.C. 102(e) as being anticipated by **Edmondson et al.,** (Edmondson) U.S. Patent Publication No. 2004/0117613 A1.
- 4. As to claim 1, Edmondson teaches a network maintenance tool, comprising:

 an interface associated with at least one network device (refer to paragraph 18 and 131);

a device detection module coupled to the interface, the device detection module configured to receive at least one device parameter from the at least one network device and to generate a device template based on the at least one device parameter (refer to paragraph 18 and 131); and

a translation engine coupled to the device detection module, the translation engine configured to store the device template (refer to paragraph 18).

Application/Control Number: 10/620,349

Art Unit: 2155

- 5. As to claim 2, Edmondson teaches the tool of claim 1, wherein the translation engine is further configured to translate a command received from a user based on the device template, the translation engine is further configured to send the translated command to the at least one network device (refer to paragraph 18).
- 6. As to claim 3, Edmondson teaches the tool of claim 1, wherein the translation engine is further configured to parse a command received from a user into a plurality of parsed commands, translate each of the plurality of parsed commands based on the device template, and send the translated plurality of parsed commands to the at least one network device(refer to paragraph 18-20);
- 7. As to claim 4, Edmondson teaches the tool of claim 1, wherein the translation engine is further configured to read and translate incoming data from the at least one network device based on the device template (refer to paragraph 18 and 131).
- 8. As to claim 5, Edmondson teaches the tool of claim 1, further comprising a visual development module configured to allow a user to construct device-specific commands (refer to paragraph 18-20);
- 9. Claims 6-15 do not teach or define any new limitation above claims 1-5; therefore, they are rejected for similar reasons.
- 10. Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the
